## Ventanilla de Salud

NWFS Staff work to improve family stability and child well-being for Mexican citizens and those of Mexican descent with the Mexican Consulate in Portland, Oregon.

Northwest Family Services, beginning in 2016, formally contracted with the Mexican Government to provide an array of health navigation and social services impacting thousands annually.

### Testimony from Ms. Martina Ramos:

*With the service and information provided through Ventanilla de Salud, I have gained strength and professional counseling. I have been able to find assistance with rent and I was supported through a difficult situation with my husband. I'm very grateful for Ventanilla de Salud and the staff.*

*Dental resources, free eye screening, and prescription glasses are other resources I was able to access. Also, I have had Health Prevention Education and found a low-income clinic where we can now have a medical home. I am grateful for the help that Ventanilla de Salud has provided to my family and I.*
